k1e7l@BOOK-V2TI5OAE9C MINGW64 ~/repo-sync (main)
$ cat hello.md
#지역과 원격저장소 연

k1e7l@BOOK-V2TI5OAE9C MINGW64 ~/repo-sync (main)
$ git switch origin/main
fatal: a branch is expected, got remote branch 'origin/main'
hint: If you want to detach HEAD at the commit, try again with the --detach
option.

k1e7l@BOOK-V2TI5OAE9C MINGW64 ~/repo-sync (main)
$ git checkout origin/main
Note: switching to 'origin/main'.

You are in 'detached HEAD' state. You can look around, make experimental
changes and commit them, and you can discard any commits you make in this
state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may
do so (now or later) by using -c with the switch command. Example:

  git switch -c <new-branch-name>

Or undo this operation with:

  git switch -

Turn off this advice by setting config variable advice.detachedHead to false

HEAD is now at 11d9e30 Update hello.md

k1e7l@BOOK-V2TI5OAE9C MINGW64 ~/repo-sync ((11d9e30...))
$ cat hello.md
#지역과 원격저장소 연동
